120W LED Aquarium Light

Model No.: BS-57-A (White:10,000K-20,000K, B: 460nm)

Photo A:spread evenly

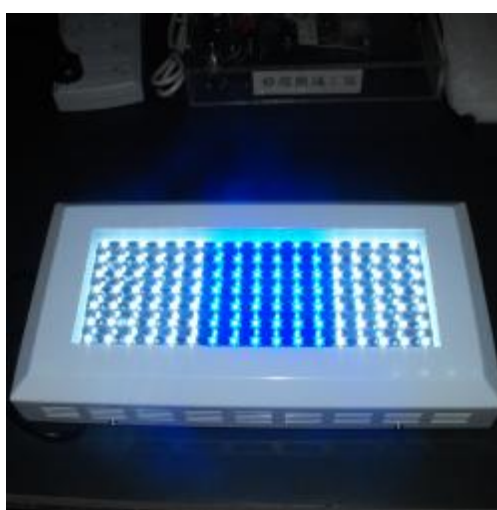

photo B:spread separately

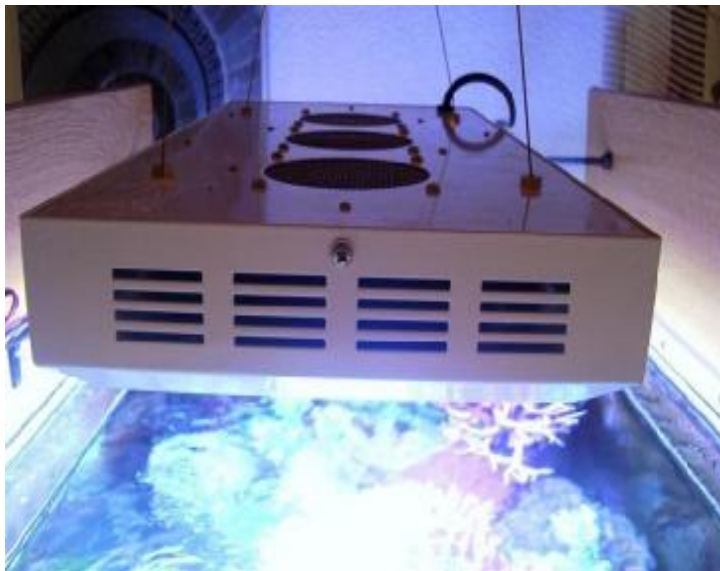

Benefits :

This light with switch to control different color. It can save more power for ender users. For example, when you need blue color and do not need white color, you can turn on the switch of blue and turn off the switch of white. If you need white color, just do it in the same way. When you turn on three switches, both of the colors are on.

Feature:

1. 120w led aquarium light with CE certification
2. LED Quantity: total 119pcs inside
3. Color temperature: pure white----14,000k, Blue---460nm
4. 14 to 16 hours per day is all that necessary for maximum fish metabolism and plant health by accelerating activity and plant photosynthesis.
5. High efficiency, save 85% power consumption, save electricity bills, save money for the end user
6. Unique design, light and beautiful
7. No need outside power supply, convenient to use
8. Use built-in switching mode power supply, above 97% efficiency
9. Emit the wavelength of light which can be fully absorbed by the coral

- 10 Use kinetic theory of air to solve the heat problem
- 11 Can be directly placed above the plants, no scorching at all
- 12 Lighting protection, vibration protection
- 13 Easy to install and use, plug into the electric outlet(120/230Vac) directly
- 14 Running quiet and cool, no need heat-removal equipment
- 15 Ideal for all phases of plant growth

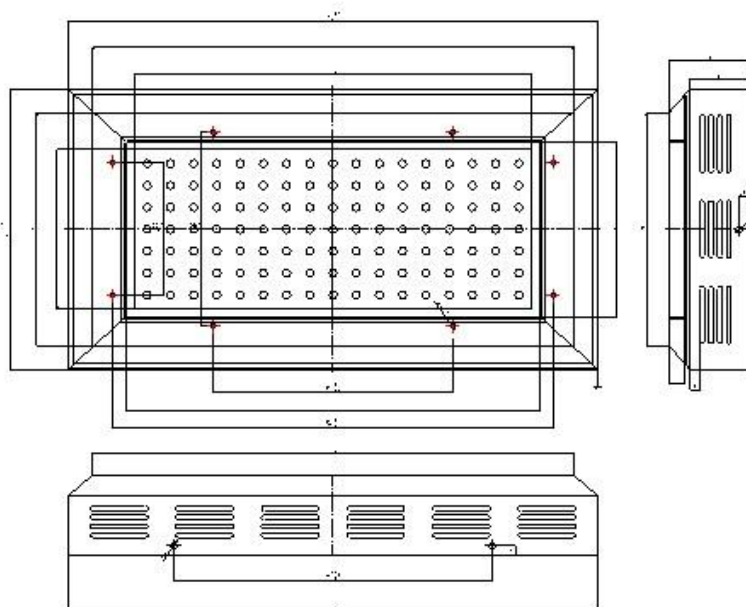

Dimension:

L:40cm

W: 21.3cm

H:7.1cm

Fro

Specification:

Parameter:	BS-57-A
Input voltage	120/230VAC
Power	120W
LED Qty	119pcs
Color	W&B
Wavelength	White:10,000K--14,000K, Blue:460nm
PF	0.97
IP	IP50
Working environmental temperature	-20 ~ +50degrees
Packing size	45x26x12.3cm
Weight	N.W 4.5kg /G.W 5kg
Life time	50000hrs

LED aquarium light wavelength test result:

1) Blue LED 460nm

2) White LED
